The "Courage to Care" campaign was launched by USU's Center for the Study of Traumatic Stress to raise awareness of the strength and courage required in parenting during stressful times.

# Judah Folkman, M.D.

1933-2008

"In 1961, while conducting medical research in a U.S. Navy lab, Dr. Judah Folkman stumbled upon a hidden secret about how cancer grows. Before the decade was out, he was forming the theory that would occupy the rest of his professional life. He called that theory angiogenesis, and in it he postulated that tumors could not grow larger than the head of a pin without a blood supply. He also believed that the tumor secreted some mystery factor that stimulated new blood vessels to form, bringing nutrition to the tumor and allowing it to grow."

## CRISIS AS OPPORTUNITY

The Chinese word for "crisis" is made up of two parts: "danger" and "opportunity".

"Danger": originally pictured as a man on the edge of a precipice.

"Opportunity": a reminder of the seemingly small but important opportunity that can come out of danger.

# Educational/Career Opportunities at USU

**"We at USU strive to have our student body reflect the diversity in the military"**

Commander Margaret Calloway, MC, USN  
*Associate Dean for Admissions and Recruitment*

**"The wealth of research opportunities here is mind blowing... You have to cross cut if you want your research to have clinical relevance. Everyone here is so welcoming about collaborations and talking about research. It's a joy"**
